Dear Sirs,

Many of us voters in Santa Fe are upset by the Forest Service plan to cut and burn 50,000 acres of our treasured forest without first performing an EIS!

Please open this matter to scientific debate on the ecological results on various methods of preserving our forest. And most importantly, this debate must be heard by public officials and the public in general.

I expect to receive a response and a record of this communication.

Lura Brookins

---

Dear Mr Hannah Bergemann,

As a citizen of Santa Fe and protector of our great National Forests, especially our own here in Santa Fe, I am again asking the Forest Service to stop any plans to cut and burn 50,000 acres of our forest and it's fragile ecosystem.

Please perform an EIS before any action and please invite and be open to public and scientific debate.

I look forward to your action to protect and your reply,  
Lura Brookins

Dear Sirs,

Performing an EIS needs to be happening now to protect the future of our forests here in New Mexico!

Comments:

Dear Forest Service, what is the rush to cut and burn?

Please perform an EIS study before any action.

We in Santa Fe deserve time to study, research and evenly debate this drastic plan to cut and burn 50,000 acres.

Please honor citizen concern and our forest's ecology.

Comments:

Desr Sirs,

Please perform an EIS document for our Santa Fe National Forest before any cutting and burning!

There has been no debate, discussion or openness to alternative theories of forest stewardship.

Please respond.

Lura Brookins  
Santa Fe
