Santa Fe Mountains Landscape Resiliency Project

I am writing to express my concern for the Santa Fe mountains resiliency project as it currently stands. This area is much too large to cut corners and time and is a major part of our eco system.

1) A comprehensive Environmental Impact Statement is required for a project of this scope and size that may have significant impacts on the human environment and on resources such as recreation, Roadless Areas, Wildlife, weather, mudslides and more.

2) The Analysis must be site-specific. The condition-based approach is too general and vague to make meaningful scoping comments.

Thank you for your time and consideration,

Rachael Gilman
