Comments:

Dear Mr. Melonas,

HERE IN SANTA FE, WE WANT AN EIS (Environmental Impact Statement) regarding our 50,000 acres of forest. We only have until July 10 to request an EIS.

Please do an EIS for the Santa Fe Mountains Landscape Resiliency Project and make sure analysis is site specific. [You can copy/paste this sentence.]

It's our right, please, no matter what your position is on thinning and burning in our forest, help make sure it's done right.

"This is clearly consistent with the Trump administration's desire to reduce government and to cut the public out of the process of managing a public asset," said Susan Jane Brown, an attorney for advocacy group Western Environmental Law Center, as The Washington Post reported.

"To try to draw a line between climate change-induced wildfire and the need to cut the public out of the process of wildland management is disingenuous."
