Santa Fe Mountains Landscape Resiliency Project

I wish to register our rejection of this project on several grounds:

First, we know from the Los Alamos fire that intentional burns get out of hand.

A burn this close to Santa Fe will cause a severe loss of air quality.

Even more important is the loss of untrammeled forest.

Have you revealed what lumber company stands to gain from our and wildlife 's loss? Who is it? What power do they have to make this happen?

There are other measures that can be encouraged that protect homes better than massive logging and burns.

We have moved to Santa Fe in part because there still are sections of untrammeled forest and natural life. Don't take this away.

Please, NO, NO, NO to this destructive project.

Diana and John Stege

434 San Pasqual, Santa Fe, NM 87505
