Santa Fe Mountains Landscape Resiliency Project

Jun 25, 2019

Forest Supervisor James Melonas

Dear Forest Supervisor Melonas,

Frankly, the idea that your plan is supposed to "restore forest health" really sounds like you want to get all the commercial profit out of this 50,000 acres while cutting down old growth forests, killing off Mexican spotted owls & probably many other species of wildlife that uses this forest as habitat, and to top it off, putting more roads (which will be needed by loggers) in a very fragile forest! We (US American taxpayers) dont need more "former" forests - we need MORE forests, MORE wildlife habitat. Its time to do the right thing for our remaining wilderness areas - of which this national forest is one.

The Santa Fe Conservation Alternative sounds like the way to do that. Listen to them!

Sincerely,

Maggie Frazier
