Comments:

Hi, I am reaching out as a concerned business owner and community leader of Santa Fe.

After I have learned what US Forest Service is planning on destroying Forty - three thousand acres, I am asking the US Forest Service to evaluate IN DEPTH the risks and costs of this disastrous plan.

I believe that scientist, environmentalist and city officials have a responsibility to review in depth and question these plans for our forest for their economic, legal, liability, health and safety and obviously environmental impacts on the city and county of Santa Fe.

Thank you for your time,
