Comments:

Dear Sirs,

Many of us voters in Santa Fe are upset by the Forest Service plan to cut and burn 50,000 acres of our treasured forest without first performing an EIS!

Please open this matter to scientific debate on the ecological results on various methods of preserving our forest. And most importantly, this debate must be heard by public officials and the public in general.

I expect to receive a response and a record of this communication.

Lura Brookins
Santa Fe
