Santa Fe Mountains Landscape Resiliency Project

Hello,

I am writing to ask that you please do a properly considered and authorized impact study before you go through with this project . I suspect the study will find this project will have terrible consequences for our forest causing massive destruction of the ecosystem, wildlife and watersheds. Not to mention the unknown effect climate change will have on the areas recovery.

Please send a confirmation number to show you have received this email.

Yours Sincerely

Helen Chantler

Santa Fe NM
