Santa Fe forest areas

To the forest service,

I have recently read that your department wants to thin the forest around Santa Fe, NM. Your department's history with controlled burns is awful and with the residents that live in those wooded areas I feel it will be dangerous and possibly deadly. The following specific concerns are also among my highest priority to address:

1) A comprehensive Environmental Impact Statement is required for a project of this scope and size that may have significant impacts on the human environment and on resources such as recreation, Roadless Areas, and Wildlife (or any others you want to mention).

2) The Analysis must be site-specific. The condition-based approach is too general and vague to make meaningful scoping comments.

Nick Medina

NM resident and land owner
