Title:

Comments:

Please consider the health of WILDLIFE and the public when using aerial ignitions containing potassium permanganate, ethylene glycol and diesel fuel and how these are currently affecting our health and well-being. These harmful chemicals also impact the economy, tourism and reputation of Santa Fe as one of the cleanest cities in the country.

I am also concerned about opening roads and increasing the exposure of our wilderness to further exploitation by industry which can degrade wildlife habitat, spread invasive species, and allow arsonist and wildlife poachers free access. Many roads in the forest should be completely obliterated, not improved for access.

Thank you for your time and consideration of my concerns.
