Comments:

Landscape Resiliency Project

To Whom It May Concern:

I am opposed to the Forest Service's broad scope approach to forest control for the following reasons:

1) A comprehensive Environmental Impact Statement is required for a project of this scope and size that may have significant impacts on the human environment and on resources such as recreation, Roadless Areas, and Wildlife (or any others you want to mention).

2) The Analysis must be site-specific. The condition-based approach is too general and vague to make meaningful scoping comments.

Sincerely,
Dr. Nancy Wasser
