irresponsible 'prescribed' burns

Are you people insane??

Why in the world do you keep conducting these wasteful prescribed burns?

You put more combustion and smoke in the air, you destroy habitats for the dwindling animal and insect population, you force people to stay indoors not to get sick by the smoke.this is NOT what we need or want!

We should be planting millions of trees, NOT burning them down!

Why not, INSTEAD, issue permits for people to go in those areas and collect firewood?

I, for one, would be first in line.

My 2 cents,
thanks for reading.
