Subject: 50,000 acres of forest here in Santa Fe; regarding a site specific EIS which is done with caution & care as health & environment issue

Dear Mr. Melonas,
HERE IN SANTA FE, WE WANT AN EIS (Environmental Impact Statement) regarding our 50,000 acres of forest. It is wrong not to fully inform & involve all of us in this process. I understand the deadline for input & comment is July 10, 2019.

You must do an EIS for the Santa Fe Mountains Landscape Resilency Project and make sure analysis is site specific.

Additionally I require that there be a highly visible, accurate & genuine effort made to fully inform the public of all decisions, meetings & public notices well before any plans are finalized.

You are managing my 'backyard' as a resident of Santa Fe. It's my right to require you as a Public Servant to make sure it's done right:

* Unacceptable to cut the public out of the process of managing a public asset.

* "To try to draw a line between climate change-induced wildfire and the need to cut the public out of the process of wildland management is disingenuous."

Thank you for your time and efforts in this matter.

Sincerely,

Andra Stewart

35 year permanent resident & homeowner in Santa Fe, New Mexico
