

Please consider my testimony with regard to the forest service management of the Santa Fe National Forest:

A comprehensive Environmental Impact Statement is required for a project of this scope and size that may have significant impacts on the human environment and on resources such as recreation, Roadless Areas, and Wildlife (or any others you want to mention).

2) Analysis must be site-specific. The condition-based approach is too general and vague for it to be possible to even make meaningful scoping comments.

3) There was not nearly enough information in the Scoping Document to make informed comments about the project.

Thank you,
Marcy Pompei
